Wireless screen sharing and digital signage

Looking to unlock teacher mobility and student participation? Equip your TVs, projectors and smartboards with the Airtame 2 and enjoy wireless screen sharing and versatile digital signage.

Wireless presentations for student-centric learning

- Untether teachers from the front of the classroom and engage students with wireless presenting. Connect from any device using the Airtame app, Google Cast, AirPlay or Miracast.

- Mirror your full screen or a single window, with the option to share to multiple displays from the app on your computer.

- Utilize the pin code prompt to ensure connectivity to the right display and prevent unwanted connections.

Digital signage to inform and inspire

- Inform the school community of class schedules and extracurricular activities.

- Motivate students during the exam period with encouraging quotes and messages.

- Nurture school spirit with image galleries that celebrate performances, sporting events and graduation ceremonies.

- Schedule screens to turn on and off according to school hours.

Cloud management for efficient maintenance

- Equip the IT department with real-time, remote access to device management in Airtame Cloud.

- Edit settings and carry out updates in bulk.

- Enable user permissions to delegate control according to rank, location and use case.

- Save time and effort with collaboration that scales with the needs of your school.

Security for complex networks

- Integrate Airtame seamlessly into your enterprise network to let users connect safely whether they're on the staff, student or guest network.

- Authenticate your Airtames in a Windows domain.

- Configure a web proxy to filter internet access.

- Get support from Airtame's network specialists for optimal integration.
